## FROM THE FRONT LINES

Fresh off another trip onto the African Continent, I can tell you the Lord is moving powerfully amongst those He is seeking to save. The bible tells us Jesus came to seek and save those who are lost. Paraphrasing now, Jesus says that it's the sick person who is in need of a doctor not the one who is well.

I have had many trips and seasons on the field when I have seen God move mountains, breakthrough barriers, and remove obstacles on our behalf in order to get His word into the hearts of others. But rarely have I seen so many hearts of the lost break one after another, after another, after hearing the gospel and immediately respond to Christ as Savior.

It was like watching a movie with unexpected plot twists. One minute I'm preparing my heart to leave the home visit without seeing anyone repent and come to Christ while praying how to set up another appointment to come back, when suddenly the Lord ever so gently moves in like a autumn breeze in the late afternoon, and touches the heart of the unbeliever. Watching the heart become tender right before my eyes and immediately come under conviction and receive Christ. It seemed like every other home we visited this scenario played out in one way or another.

The hunger we are seeing in the regions we are working in Southeastern Kenya is nothing short of miraculous. It's my hope and prayer that everyone who follows Christ would one day have the opportunity to experience what I have no words to describe.

May all of us who are contending for the true faith in this hour humbly come to Him and continue to ask the Lord of the harvest to send out laborers for the fields are white.

Blessings in Christ.

# CLEAN WATER PROJECT

## Kwa Vonzza, Kenya

## Yatta Range: Machakos and Kitui Counties

Pictured above is an aerial view of Kwa Vonzia and its surrounding areas. This portion of Southeastern Kenya is part of the ASAL-Arid and Semi-Arid Lands. The rainfall can be scarce and often times the local inhabitants don't get enough rainfall to harvest as the people here all do terrestrial farming, which means they depend on the rain to farm their crops.

The surrounding towns and villages all suffer from severe lack of access to clean drinking water and many become sick with diarrheal diseases stemming from all kinds of waterborne bacteria causing all kinds of health challenges like cholera, E-coli, dysentery, typhoid to name a few.

All are affected by contaminated water, but children 5 years and under are the ones affected the most as the bacterial infections cause development issues and wrecks havoc on their little systems which are unable to fight the infections and diseases and in some cases becomes the root cause of childhood death.

# Southeastern Kenya

Contaminated Drinking Water

Contaminated drinking water is the reality for most people who are poor and live the rural areas existing on about two dollars a day. For most of these people this is just how it is. Lack of hygienic toilets, lack of rainfall, agricultural runoff, population growth, government corruption, no infrastructure all contribute the water situation. Actually the water situation is only getting worse not better.

## Fetching Water

Water Source

Fetching water is a daily chore for most families where the woman and young girls can spend up to two hours depending how far they have to go just to fetch contaminated water that is going to make them sick. And depending on the community, families encourage one another to not let the young girls go and fetch water alone as this can be dangerous. Just think we relieve ourselves in safe drinkable water everyday.

## New Life Filter

After planting churches and by God's grace having had developed a team of leaders, prayerfully TSP has decided to take up the burden of providing families with the gift of clean water while at the same time sharing the gospel with them and providing an opportunity to personally receive Christ as Savior. *(The two pictured from left both received Christ. One during the crusade and other on the home visit).*

# Muslim Woman Comes to Christ

Village Ministry, Kenya

The woman standing is one of our trained Missionary Staff who helps oversee village ministry and discipleship. Her name is Anne and she is an amazing woman of God who God uses to lead many to Christ. Anne was the one presenting the gospel in this family home when we were out following up on people from our recent crusade.

The woman seated in the chair is a Muslim and a neighbor to the family we were following up on who came over and wanted to see the installation of the New Life Filter. One thing led to another and the Holy Spirit showed up and this precious soul repented and gave her life to Christ. Our God is amazing!

## KITUKUNI MAN GETS SAVED

We first the man pictured to the right at the crusade we did the week prior near his village. After installing his water filter one of the people who attended the evangelism training was chosen to be the one to share the gospel using the filter and bucket system to share the truths of Christ life, death, and resurrection. The man had some questions and other heart issues which our team member handled with grace and ended up leading the man to Christ. No matter how many times I see this miracle it never gets old. He is now part of the Kitukuni Fellowship.

# New Life Filter Evangelism Training

Breakout Session Evangelism Training

Evangelism Training Class-New Life Filter

It is always so fun to train new soul winners. No matter what the context or location, training people to 'go therefore and make disciples' is so awesome. Not only is the classroom time fun and exciting, a time of building relationships and preparing them to go but then going out with them into the field and witness Gods people muster the courage to share their faith often times for the first time ever is so cool. Then, when they get the opportunity to lead someone to Christ after sharing the gospel is such a transformational moment for them and getting to witness that event is such a privilege. I'm so overjoyed to watch people catch fire and become life long soul winners for Jesus. When people ask me, 'What exactly goes on 'over there?' Well that's it in a nutshell.

## New Life Filter Bucket System

Our New Life Filter Bucket System is an expression of love for all who receive one. The New Life Filter not only is a gift of clean water just like God originally made it but also doubles as a powerful object lesson to share the gospel. One filter gives 10 people clean drinking water for 8 years, not to mention empowering local churches to reach their communities for Christ and begin new churches.
